Professional Summary

- BSc Information Technology undergraduate seeking a Software Engineering internship, with hands-on project experience in both Java/Spring Boot microservices and modern React/Node.js, Next.js full-stack development. Passionate about bridging robust backend architecture with seamless user interfaces, alongside a growing interest in cloud deployment (AWS, Docker).

EDUCATION

University of Vavuniya

Bachelor of Science In Information Technology

Vavuniya, SL

2023 – present

TECHNICAL SKILLS

Languages: Java, TypeScript, JavaScript, SQL, PHP, HTML5/CSS3, C++, C#

Frameworks: Spring Boot, React, Next.js, Node.js, Express, React-Native (Basics)

Databases: MySQL, MongoDB

Developer Tools: Maven, Git, Postman, Axure RP, IntelliJ IDEA, VS Code, Docker (Basics)

PROJECTS | PORTFOLIO -

I-Computers | Node.js, Express, React, MongoDB, Supabase

Dec 2025 – Feb 2026

- Developed a full-stack MERN e-commerce application as a personal project featuring a complete customer shopping flow, cart system, and an admin dashboard for inventory management.
- A secure RESTful API using Node.js and Express, implementing role-based access control (JWT) and integrating Google OAuth alongside Nodemailer for OTP password recovery.
- Built a responsive React and Tailwind UI deployed to Vercel, backed by a Render-hosted API, MongoDB database, and Supabase image storage.

UniMerch | Java, Spring Boot, Maven, React, MongoDB, REST API

April 2026 – June 2026

- Developed a full-stack e-commerce platform as a group project in the university to browse products, dynamic cart management, and seamless order placement.
- A secure RESTful API backend using Spring Boot and MongoDB to manage user authentication, product catalogs, and transaction data.
- Built a responsive React frontend using a decoupled architecture to ensure system scalability.

Job Application Tracker | Next.js, TypeScript, React, MongoDB, Tailwind

In development

- Developing a full-stack Next.js and MongoDB web application featuring secure login and an interactive drag-and-drop dashboard to help users easily organize and track job applications across different hiring stages.

Patient Management System | Java, Spring Boot, Docker, PostgreSQL, Kafka, gRPC, AWS

In development

- Developing a secure, microservices-based patient management backend using Java, Spring Boot, Docker, and PostgreSQL.
- Integrating Kafka and gRPC for efficient real-time data transfer between services, and simulated scalable AWS cloud deployments for comprehensive testing.
